

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

	PAGE
The morphology and cytology of the aecidium cup (with plates I and II and eight figures) - -	<i>F. D. Fromme</i> 1
Investigations on the phylogeny of the Angio- sperms (with plates III-V and three figures) <i>Irving W. Bailey and Edmund W. Sinnott</i>	36
The anatomy of six epiphytic species of <i>Lycopodium</i> . Contributions from the Hull Botanical Laboratory 189 (with twenty-eight figures) -	<i>J. Ben Hill</i> 61
A study of the germinating power of seeds (with eighteen figures) <i>M. L. Darsie, Charlotte Elliott, and George J. Peirce</i>	101
The development of the embryo sac in the Con- vallariaceae (with plates VI and VII) - -	<i>F. McAllister</i> 137
Comparative morphology of some Leguminosae. Contributions from the Hull Botanical Lab- oratory 190 (with plates VIII-XI) - -	<i>John N. Martin</i> 154
Contributions to the anatomy of Mesozoic Conifers. No. 2. Cretaceous lignites from Cliffwood, New Jersey (with plates XII-XV) - -	<i>Ruth Holden</i> 168
Quantitative criteria of antagonism (with four figures) - - - - -	<i>W. J. V. Osterhout</i> 178
Evaporation and soil moisture in relation to the succession of plant associations. Contribu- tions from the Hull Botanical Laboratory 191 (with twenty-seven figures) - - - -	<i>George D. Fuller</i> 193
On certain peculiar fungus-parasites of living insects (with plates XVI-XIX) - - - -	<i>Roland Thaxter</i> 235
Thermotropism of roots. Contributions from the Hull Botanical Laboratory 192 (with six figures) - - - - -	<i>Sophia Eckerson</i> 254
Oogenesis in <i>Hormosira</i> . Contributions from the Hull Botanical Laboratory 193 (with plate XX and seven figures) - - - - -	<i>M. R. Getman</i> 264
The measurement of antagonism (with three figures) - - - - -	<i>W. J. V. Osterhout</i> 272

	PAGE
Field notes on the climbing bamboos of Porto Rico (with plate XXI) - - - - -	Agnes Chase 277
Delayed germination in seed of <i>Alisma Plantago</i> . Contributions from the Hull Botanical Laboratory 194 (with eight figures)	William Crocker and Wilmer E. Davis 285
Spore conditions in hybrids and the mutation hypothesis of De Vries (with plates XXII-XXV) - - - - -	Edward C. Jeffrey 322
Reproduction in plants. Contributions from the Hull Botanical Laboratory 195 - - -	John M. Coulter 337
New or peculiar Zygomycetes. 3: <i>Blakeslea</i> , <i>Dissophora</i> , and <i>Haplosporangium</i> , Nova Genera (with plates XXVI-XXIX) - - -	Roland Thaxter 353
The forms of antagonism curves as affected by concentration (with three figures) - - -	W. J. V. Osterhout 367
Prairie vegetation of a mountain-front area in Colorado (with nine figures) - - -	Arthur G. Vestal 377
A study of <i>Symphyogyna aspera</i> . Contributions from the Hull Botanical Laboratory 196 (with plates XXX-XXXII) - - -	Florence A. McCormick 401
Spermatogenesis in <i>Marsilia</i> . Contributions from the Hull Botanical Laboratory 197 (with plates XXXIII and XXXIV) - - -	Lester W. Sharp 419
The plant successions of the Holyoke Range. Contributions from the Hull Botanical Laboratory 198 (with map) - - -	Edith A. Roberts 432
Histology of flax fruit (with four figures) - - -	Kate B. Winton 445
The transpiration of emersed water plants: its measurement and its relationships (with three figures and fourteen charts) - - -	Charles H. Otis 457
Contributions to the knowledge of the diaphragms of water plants. I. <i>Scirpus validus</i> (with sixteen figures) - - -	Laetitia M. Snow 495
Fasciation (with seven figures) - - -	M. A. Brannon 518
 BRIEFER ARTICLES—	
Philippe Edouard Leon van Tieghem (with portrait) - - - - -	John M. Coulter 527
Retention of chlorophyll through the paraffin process - - - - -	E. G. Anderson 528
